

Preclinical studies
in Gut & Gut-brain
for therapies of tomorrow

Enterosys is a CRO scientifically rooted
in the gut and inter organs
communication

“Every disease begins in the intestines.”

Hippocrates, the father of modern medicine

ENTEROSYS
Gut is the link

Our mission

Enterosys proposes preclinical studies for tomorrow's health solutions

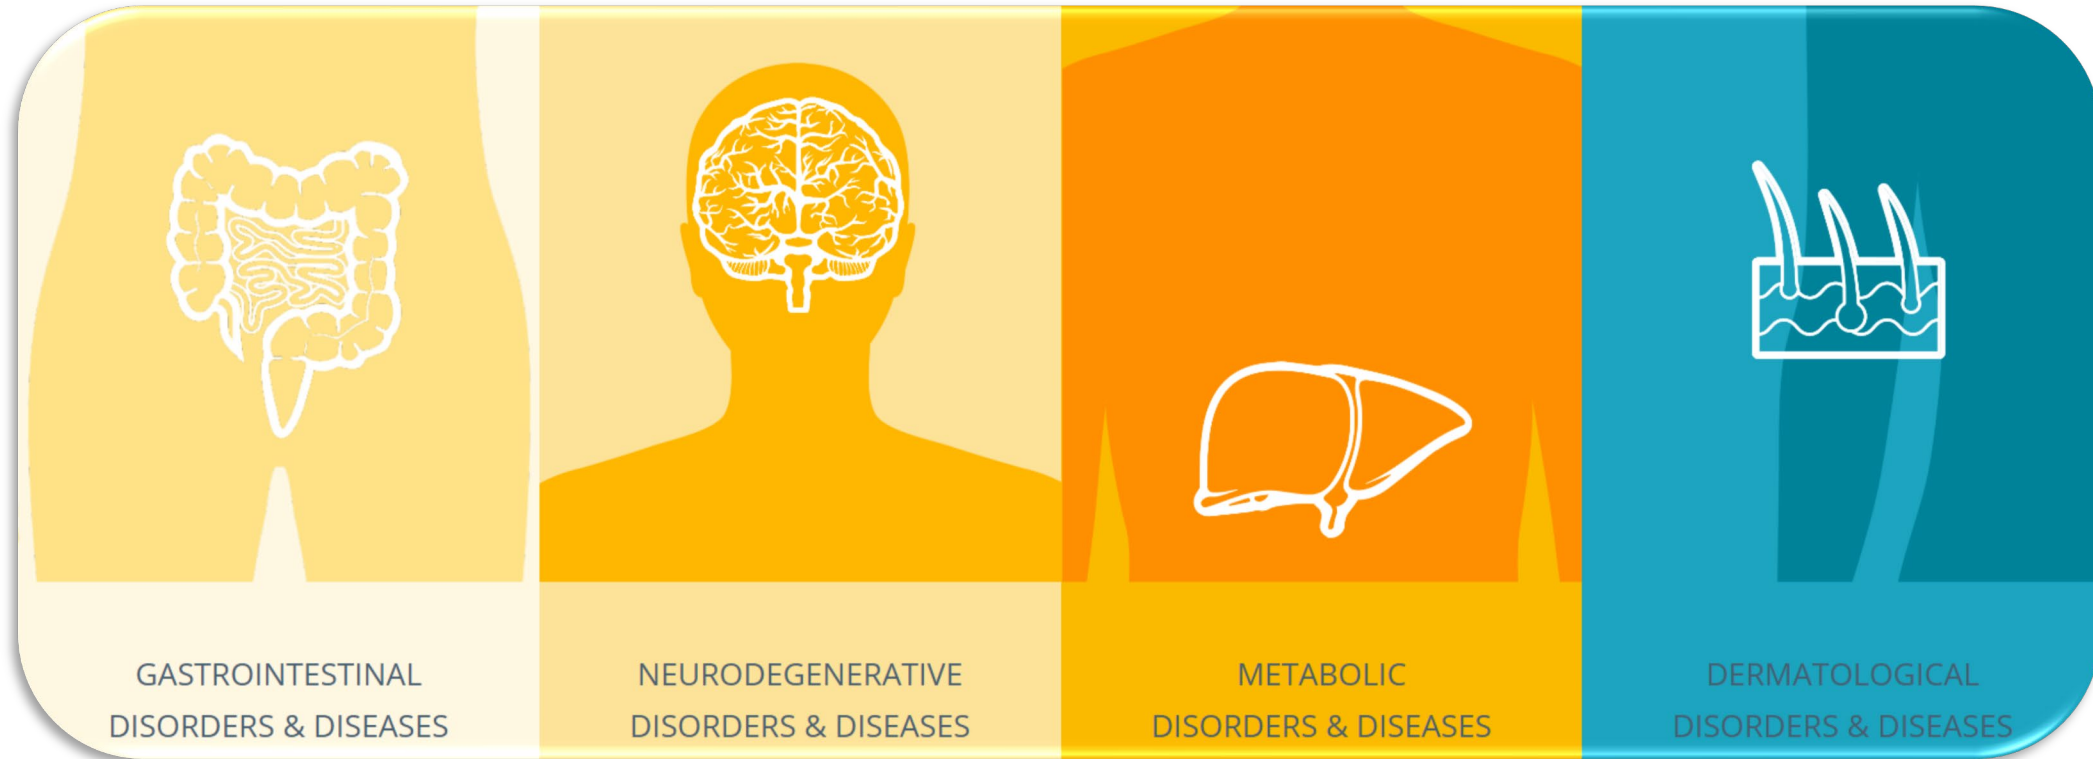

- Custom preclinical models
- Validated preclinical models
- *In vitro* & *in vivo** translational solutions

*in strict accordance with the ethical protocols validated by the national ethics committee, in compliance with the 3R rule and under official veterinary supervision.

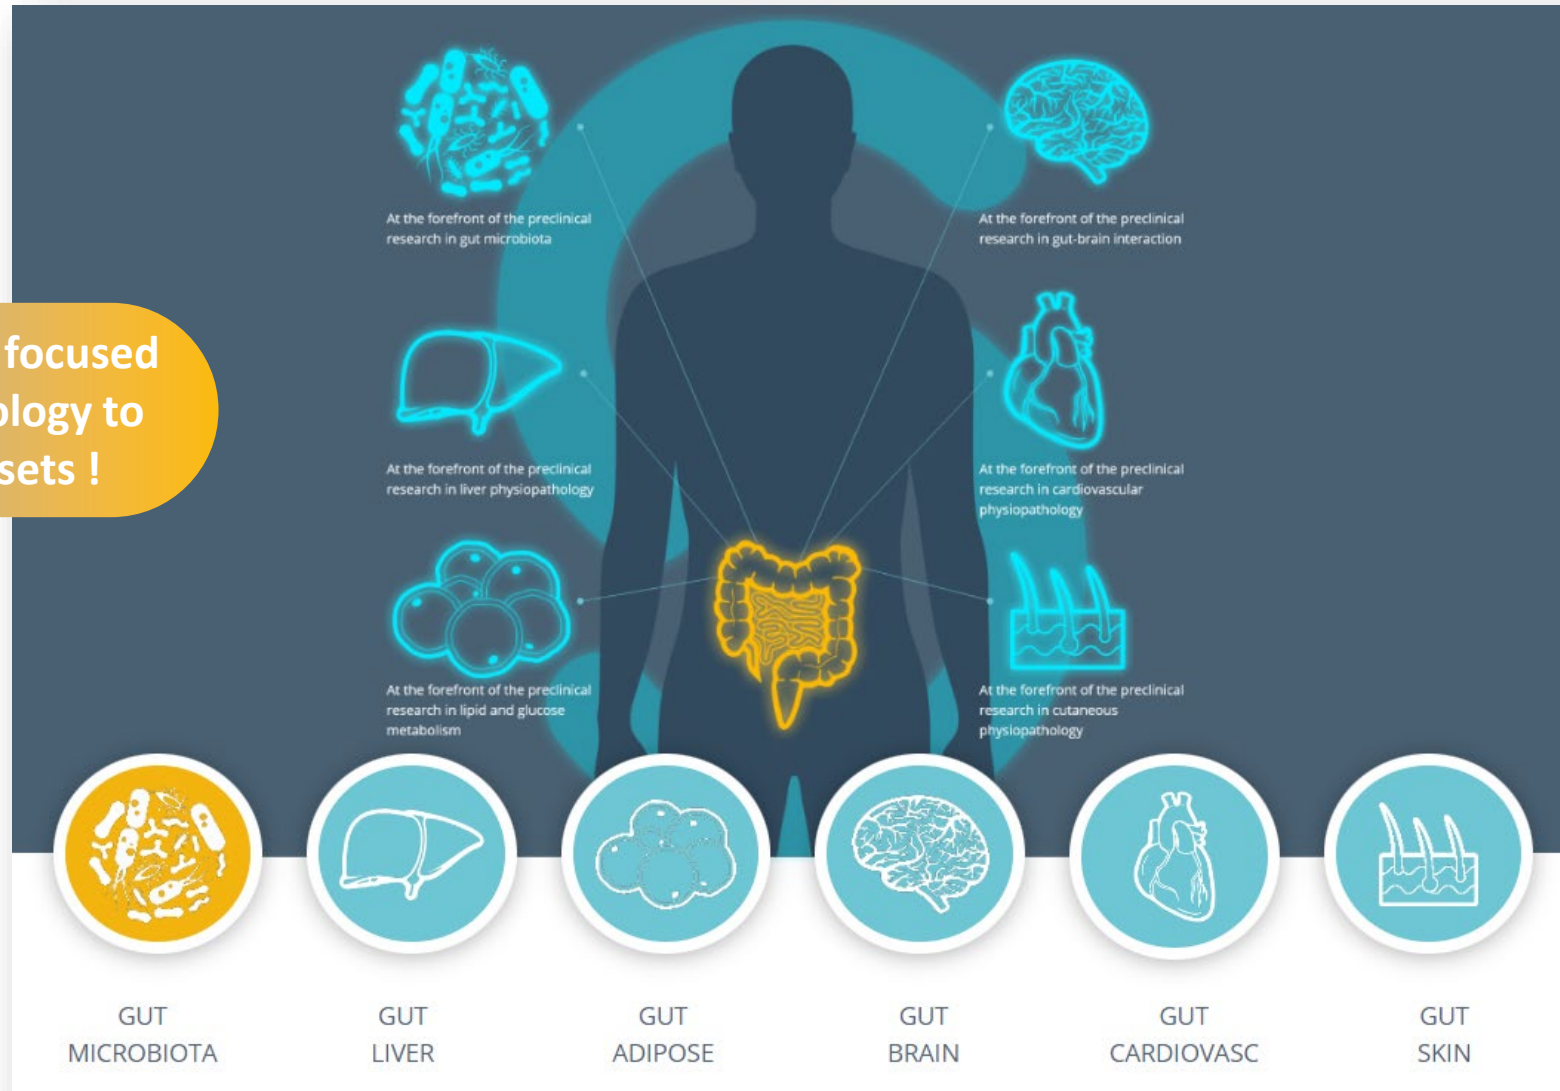

Explore **GUT** ways!

Challenge your molecules on gut & gut-organs communication

The gut organs approach, central perspective for the preclinical studies

A holistic approach focused on digestive physiology to enhance your assets !

Enterosys as Lab accelerator

CUSTOMIZATION

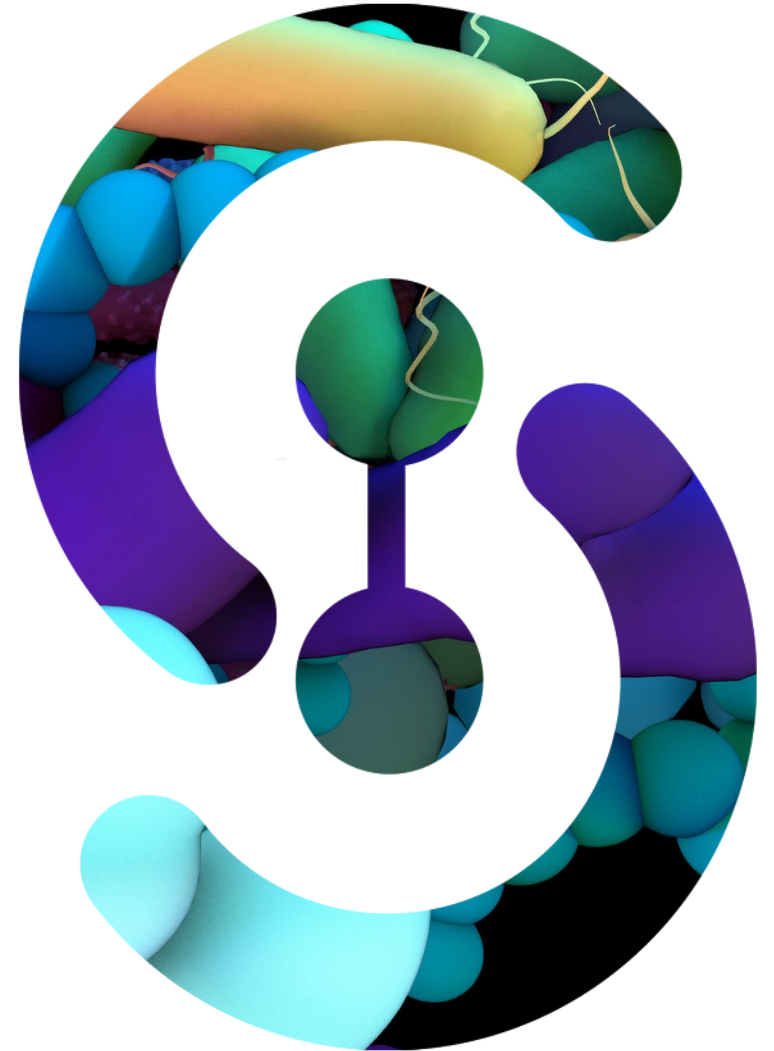

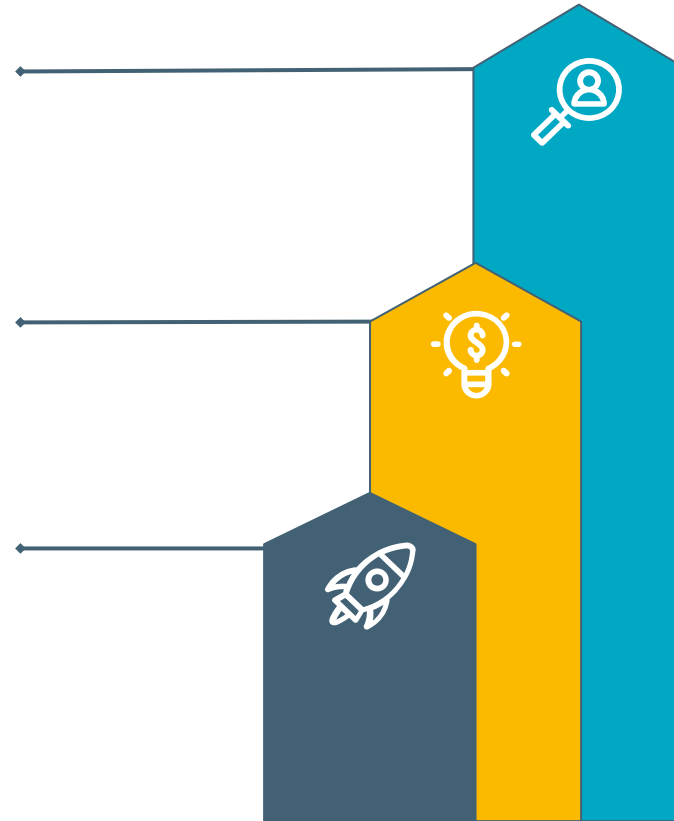

Tailor-made protocol design
Opportunity to differentiate

INNOVATION

Original technologies
Adaptability according to the needs
of our customers

PERFORMANCE

Real time analysis for multiple benefits
Prediction with reduced risks
Save time and development cost
Accelerate the timeline to drug approvals

They trust us for our preclinical studies

Our ecosystem

- A team of experts in Research & Innovation

▸ Prs. Knauf, Burcelin & Cani
co-founders

▸ JC Malrieu
CEO
