

### Supplements R&D Insight

Create food supplements with data that supports the demand for safe, effective, compliant and innovative products in the European Union, United States and Asia.

#### 🕒 Save Time and Resources

Comprehensive information on regulations and guidelines, with data to save time in researching and understanding complex regulatory landscape.

#### ❤️ Facilitate Informed Decisions

Detailed information on ingredients, dosages, health claims, formulations and studies, empowering companies to make informed decisions about product development and marketing.

#### 🔗 Simplify Regulatory Compliance

Easy access to up-to-date information on regulatory requirements for food supplements, accelerating the compliance process.

#### 🏠 Mitigate Risks

Stay ahead of regulatory changes, reducing the risk of non-compliance and associated penalties, recalls and damage to brand reputation.

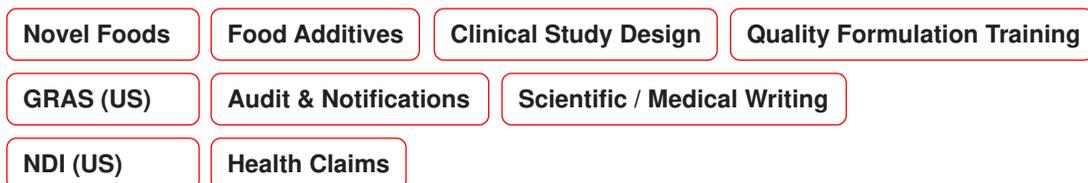

### Supplements Compliance

Launch products with instant, one-click access to regulatory audit and automated label generation.

- Check the conformity of your formulas in Europe.
- Update all your formulas and labels when regulations change or entering new markets.
- Generate labels with available health claims, mandatory warnings, list of ingredients, nutritional table, etc.
- Overview of the compliance composition for all EU countries at once/ in a glance.

### Regulatory & Scientific Consulting

Our senior experts can assist you throughout the product development cycle, offering innovative, tailor-made and strategic advice for the European Union, United States or Asia.
